Company vocational education in the following areas

**Toolmaking
Industrial Mechanics
Machining Technician
Production/Manufacturing Mechanics
Construction Mechanics
Equipment mechanics
Machine and Plant Operator
Punching and Forming Mechanics
Process Mechanics**

Mechatronics

**Automated Electronics Technician
Industrial Electrical Engineering Technician**

**Industrial Office Clerk (Women)
Office Clerk (Women)
Warehouse Logistics Specialist**

Preparation for Intermediate and Final Examinations (Parts 1 and Part 2)

For additional information on specialised courses please contact us.

Additional qualifications for vocational trainees

**Welding Steel G3
Welding Steel E1
Welding E CrNi1
Arc Welding MAG St1
Arc Welding WIG St1
Arc Welding WIG Al1
Arc Welding MIG Al1
Arc Welding WIG CrNi1
Arc Welding MAG CrNi1**

**Welding Steel G5
Welding Steel E2
Welding E CrNi2
Arc Welding MAG St2
Arc Welding WIG St2
Arc Welding WIG Al2
Arc Welding MIG Al2
Arc Welding WIG CrNi2
Arc Welding MAG CrNi2
Arc Welding MAG-fine grain**

**3D Coordinate Measurement Techniques
CIP- Continuous Improvement Process
Microsoft IC3 Certification**

**CNC-Four-Axis Milling
CNC-Five-Axis Milling**

Foreign Technical English 1 + 2

Soft Skills

Continuing Vocational Training in Metal and Electronics

Pneumatics

Electro-pneatics

Hydraulics

Electro-hydraulics

S7 Programmable Controllers

Mechantronics

Electrical Specialist for Defined Activities

Protective Measures According to DIN VDE 0100

Conventional Turning

Conventional Milling

CNC Turning (Sinumerik 840D)

CNC Milling (Sinumerik 840D or Heidenhain iTNC 530)

We will be happy to send you more modules regarding of continuing studies in metalwork and electricity

We can adapt the contents of the modules individually to meet the needs of your business!

Please speak to us!

Continuing Vocational Training for Managers in the areas of:

Communication

Moderations

Presentations

Leadership

Time Management

Stress Management

Conflict Resolution

Personal Planning

DISC - Personality Profiling

Employee Responsibility

We will be happy to send you more modules regarding continuing studies in management!

We can adapt the contents of the modules individually to meet the needs of your business!

Please speak to us!

Additional Welding Courses (DVS Course Site)

Basic Qualifications

Building Qualifications

Refresher Tests

in the process:

Gas Welding - St (G3 bis G8)
Manual Arc Welding (E1 to E6) - CrNi(E1 to E6)
Tungsten inert gas welding - TIG St (T1 to T6) / CrNi (T1 bis T6) / Stainless (TA1 to TA16)
Gas Metal Arc Welding (GMAW) MAG St (M1 bis M6) / CrNi (M1 bis M6)
Gas Metal Arc Welding (GMAW) – MIG Al (MA1 bis MA14)
Special Courses - G, E, WIG, MIG, MAG
Special Combination courses WIG/E or WIG/MAG
Flame cutting and brazing, ...

**International Welding Course
(ST Outreach Courses – Leipzig)**

Technical welding internships for students wishing to learn about practical welding

Welding Techniques for Home Improvement

We will be happy to send you more modules regarding continuing studies in welding

The exams can be taken by TÜV or DVS!

Please speak to us!

Metal / Electric Manpower Development

Individual programs for job seekers looking for a career:

**Industrial Mechanic
Machinist
Construction Mechanic
Toolmaker**

Individual programs for job seekers looking for a career in the areas of automotive, industrial supply, mechanical engineering technician, steel and metal work are available ...

We offer courses in the following subjects:

**Metal working (manual)
Technical documents
Machining machines
Conventional milling machines
Sheet metal / tube processing
Quality assurance
Assembly
Computers / Electronics
Pneumatic / Electro-pneumatics
Hydraulic / Electro-hydraulics
Programmable Logic Controller S7 Automated Technology
Automation technology
Mechatronics
CNC Turning (Sinumerik 840D)
CNC Milling (Sinumerik 840D or Heidenhain iTNC 530)**

We will gladly discuss your individual vocational needs!

Please speak to us!

Professional Development Welding

for specialised welding courses in areas catering to automotive suppliers, mechanical engineering products, pipeline construction, steel and metal construction, ventilation- and sanitary-engineering, ...

Courses are offered in the following subjects:

Gas Welding - St (G3 to G6)

Manual Arch Welding – St (E1 to E6) / CrNi (E1 to E6)

**Tungsten Inert Gas Welding - TIG CrNi (T1 to T6) /
Stainless (T1 to T6) / Al (TAL 1 to TAL6)**

Gas Metal Arch Welding (GMAW) - MAG St (M1 to M6) / CrNi (M1 to M6)

Gas Metal Arch Welding (GMAW) - MIG Al (MAI1 bis MAI4)

Special courses in G, E, WIG, MIG, MAG

Special courses combined TIG / MMA or TIG / MAG

Flame cutting, Brazing, ...

Tests are performed according to DVS or TUV standards!

We will gladly discuss your individual vocational needs!

Please speak to us!

National and International Educational Projects

BIBB - Project Model Q3

Working for, and with, companies to promote personnel training, we developed a pilot quality model to address the needs of industrial manufacturers. Embedded solutions for practical online instruments and materials can be found at: www.ghoch3.net.

Leonardo-Projects

Since 2007, Polish vocational students have been annually attending a four-week internship at our training centre Zwickau. The program includes topics such as CNC, pneumatics, electrical and welding techniques. In addition to improving their skill set, they are introduced to German industrial business practices and working conditions, enjoy some of our many cultural sites, and have a chance to improve their German language skills.

Grundtvig Lit-Tech

The primary focus of the project is to exchange experiences in the field of literacy and basic adult education training programs by organisations located in the UK, Portugal and Slovenia. These reciprocal exchanges are designed to introduce proven teaching and learning techniques to promote literacy and hands-on communication technologies (ICT). The outcomes are evaluated and the findings documented for future reference.

Qualification of Foreign Vocational Teachers / Trainers

Since 2011, foreign vocational teachers from abroad (i.e., China) have attended educational workshops and laboratories in AZZ modules. Topics included were mechatronics, pneumatics, hydraulics, PLCs, CNC turning and CNC milling. Methodological and didactic themes are specifically directed at skilled workers wishing to take the Chamber of Commerce examinations.
